# Flexy 205 installation guide

Ewon flexy 205 installation guide. H8908 installation instructions. Co-200 installation instructions.

Page 18 Alarms Management 16 (34) Fig. Custom Web Pages 25 (34) Custom Web Pages The FlexY 205 has a web server to accommodate its own internal web pages. Remote Access 9 (34) Remote Access The FlexY 205 can be used to allow remote access to a wide variety of PLC. In most circumstances, complete the rapid launch assistant configures with success the FlexY 205 for remote access. With this function, the software and the external devices can read the values of the FlexY 205 label. Since the values are stored in the non-volatile memory, they are not lost after a reboot. The values of the label can change over time and can come from a variety of data sources, including external devices such as PLC. These data sources are called to servers. Problem Solving 32 (34) 21.3 Scheduled Actions The registration of scheduled actions shows the states of the last 20 outgoing actions such as Sendmail, Putftp, GetFTP, NTPSyncro, SendSms and Smmprtrap. We, HMS Industrial Networks SA, reserve the right to modify our online products with our Continuous Product Development Policy. The FlexY 205 supports four types of data for labels: floating point, Boolean, whole and dWord. More information about using the Talk2M email and the SMS relay is available in the electronic mail relay and text message (SMS) using the Talk2M reference of the related documents, p. To create or restore a backup: Open EBUDDY and select Backup / Restoration in the Menu Bar. Page 13 Believe Labels and Monitor Values 11 (34) Fig. In addition, FlexY 205 can be configured through other mechanisms, including FTP and the use of an SD card. For example, can be used with alarm actions or task planner entries Include information, such as historical records and current label values within or attachments to an email. Alarm management 14 (34) Alarm management The FlexY 205 facilitates the monitoring of current alarms, recognizing the alarms, notifying users throughout the alarm cycle and recorded past alarm events. In addition, FlexY 205 can User believed web pages. 2 Change of the sight to the configuration mode to create a label. DOCUMENT HISTORY ... Each label must have an "Tag name" that identifies the tag in flexibility 205. Scripting 29 (34) Scripting the flexy 205 admits personalized programs using similar scripting language to the basic with many specific extensions. Historic registration 18 (34) Historic record Historical registration stores Stores Label changes for a long period in a first file in the first file in the Flash System File. The data and illustrations and illustrations that are found in this document are not binding. On the label configuration screen, there are several key fields that identify a label and their data source. Backup and restoration copy 26 (34) Backup and restoration copy Security can be created and restored using the e buddy companion tool. To change the IP address of the flexy 205: Connect the LAN labeling port (port # 1) of flexy 205. inform E to HMS Industrial Networks S of any inaccuracy or omission. 4 tag creation "Mem. If the flexy 205 is configured to connect to talk2m, the datamailbox (characteristic of talk2m) facilitates sharing data with many different platforms. Communication parameters, such as the Internet, your current internet connection and the state of the VPN connection, date and time and all firmware verations are shown. More information about all files available in the general reference guide for flexy 205 of the related documents, Page. Problem solution 31 (34) Problem solution The flexy 205 provides a series of tools to solve problems They can occur. The 205 Flexy admits label label values on Modbus TCP, SNMP and Optua. Since values are only stored in memory, they are lost after a restart. Alarm actions for each label with enabled alarms, the 205 flexy can be configured to perform different different When the state of the alarm cycle changes. The record can be activated by events, such as significant changes in the data value, on a simple interval base or a combination of the two. However, FlexY 205 can support multiple users with their own unique user rights. File transfer page 19 (34) File transfer page Many of the files in FlexY 205, including the current label values, the alarm summary, the alarm history and the historical records are Available to download from the transfer of diagnostic files>. More information on the addition of additional users is described later in this document. When enabling the NAT 1: 1 function, ads on a network can be assigned to addresses in the other. A export block descriptor is a series of characters that describe the data to export using a predefine syntax. Alarm Administration 15 (34) Fig. 4 For more details about EBUDDY. In the EWON IDENTIFICATION window, specify the serial number or IP address of the appropriate FlexY 205 and enter your appropriate administrator credentials. Page 4 Table of Contents Historical Register ..... 18 Historical Registration Configuration ..... 18 Historical registration graph ..... 18 historical registration table ..... 18 10 Transfer files Page ..... Click Next to apply configuration changes. If this network uses a proxy server or if port 80 is closed for outgoing connections, leave this check box unchecked. Publishing tag 22 (34) Label publication In addition to external device survey labels, FlexY 205 can publish label values. FlexY 205 can accommodate HTML pages Including special forms and the server side, which allow users to show and interact with labels and other data from the FlexY 205. Table of Contents Page Preface ..... 3 on this document ..... 3 document history ..... 3 related documents ..... 3 registered trademark ..... 3 requirements ..... 4 hardware ..... 4 software ..... 4 get in contact with flexibility 205 ..... on the configuration page of the label label> ... user administration 30 (34) administration of users in the initial configuration. A FlexY 205 has only one user with username adm. 5 tag creation "Siemens. Export block descriptors 26 (34) Export block descriptors Guide presents the characteristics of the 205 flexy that can be combined with optional extension cards if necessary. In addition, there may be additional configuration steps necessary in the programming software of the field device programming. A ramid launch assistant. You can add a wipped launch assistant 7 (34). Additional users can be added from the configuration> user men's. With scripting, users can: create custom reports. This user has full administrator rights in flexy 205, 22 13 Data management ..... 23 14 Nat 1: 1 ..... Check that the enabled verification box makes a internet test connection. 5 assignment of an IP address ..... 5 Access to the Web Configuration Interface ..... 5 Assistant Raven launch ..... These actions are the same as the actions of the label alarm and include sending an email, sending an SMS, placing a file on a FTP server and sending a SNMP For additional related documentation and file downloads, visit www.ewon.biz/support. If an error occurs during an action, the scheduled actions record will include an error code to help identify the source of the problem. The second screen of the system assistant configures the date and time configuration. The values of the label are recorded in a circular bufer in Memory at regular intervals to show trends about a time-defined time permit. Task planner 21 (34) 11.1 Configure the FTP server configuration before files can be placed on a FTP server through the task planner, the flexy 205 must have a work internet connection and must be configured to communicate With a FTP server. 1 Botist of the Ran launch assistant passes sequentially through the system assistant, the Internet assistant and the VPN assistant: 19 11 11 TASK PLANNER ..... 20 11.1 Configure the configuration of the FTP server ..... 21 12 Label Publishing ..... Important responsibility of the user Each attention has been made in the preparation of this document. Real-time registration 17 (34) Real-time registration registering real-time records of how a label value changes over time. Without extension cards, FlexY 205 provides remote access and remote data services to Ethernet devices through the local Ethernet network. Page 35 This página was left blank intentionally ... configuring alarm settings for an Alarming label is configured on a label per label. Raven launch assistant 6 (34) Raven launch assistant The ramid launch assistant facilitates the configuration of the initial system settings and communication for flexy 205. Recognize SMS alarms. If the automatic data type is selected, the 205 flexy will store the value of the label in a predetermined data type based on the IO server and the label address as described in the general reference guide for flexy 205 of related documents, pég. Get in touch with flexibility 205 5 (34) From the IP FlexY 205 address, the first communication with FlexY 205 can be set using the Companion E buddy tool (Verification Software, Data Administration 23 (34) Data Management FlexY 205 supports export data to a Variety of data management platforms. The contents of the page are updated at the speed shown in the AutoFresh field at the bottom of the page. 1 hands hands The user manual flexy 205 UM-0002-00 1.0 English ... Create labels and values of monitor 10 (34) Create labels and monitor values The labels are variable monitored by the flexy 205. Other mechanisms of configuration 27 (34) Other mechanisms of flexy 205 configuration can be configured through its web interface or restore a backup copy of a previously stored configuration with E buddy. Create monitor tags and values (34) Monitor labels 6.4.1 Tag screen The view mode of the labels> The stupor of values shows the last reading value for the labels. Consult related documents, PSE. Users are added, modified and removed from the configuration> ... Fig. Click next to continue to the second screen. Raven launch assistant 8 (34) Click next to move on to the next screen. Page 14 Create labels and values of monitor 12 (34) Fig. In the following window, select backup or restoration and click next. Task planner 20 (34) Task planner with the task planner, FlexY 205 can perform different actions in specific times or fixed intervals. The information on the configuration of the connections to different SMTP servers is available in the general reference guide for flexy 205 of the related documents, PSE. NAT 1: 1 24 (34) NAT 1: 1 In some circumstances, the devices on the WAN or VPN of Flexy 205 could need access to devices on the FlexY 205 Network For the Talk2M communication, the date of the FlexY 205 must be correct. Extension cards allow FlexY 205 to communicate to a broad range of field devices, including USB devices and series and to use additional internet connectivity technologies, such as Wi-Fi and cell phones. The alarm history is from Tags> Alarms> History. 10 Example of the SMTP server configuration. 3 (34) Preface About this document This guide presents the features of the Ewon Flexy 205 and briefly explains the steps to be performed to obtain a FlexY FlexY 205 page, 21.1 The summary page shows the summary page at a look at information about health and state. Condition.
